

Powering Critical Infrastructure for a Clean Energy Transition

EXHIBITOR PROSPECTUS

JOIN THE FUTURE OF POWER SYSTEMS AT INTELEC 2025!

INTELEC 2025: The Solutions Engineers Need

Electrical engineers and industry leaders at INTELEC 2025 are looking for cutting-edge solutions to advance power systems and critical infrastructure. Exhibitors can provide innovations in these key areas:

Power Conversion & Control for ICT Infrastructure

- High-efficiency power supplies and converters for 5G, IoT, and telecom networks
- Advanced cooling and predictive power management for ICT systems

Data Center Power Management

- Ultra-efficient power conversion and backup systems for AI and quantum computing
- Scalable thermal management solutions for high-density workloads

Energy Storage for Grid, Communication & Transportation

- Advanced battery management and energy storage integration for renewables
- High-performance power converters for grid, telecom, and transport applications

Power Solutions for Subsea & Downhole Applications

- Rugged power distribution and high-pressure converters for offshore energy
- AI-powered predictive maintenance for subsea and remote operations

Critical Power for Aerospace & Extraterrestrial Systems

- Radiation-resistant power and storage solutions for space and aviation
- EMI/EMC protection and high-reliability power for extreme environments

Resilient, Reliable Power for Mission-Critical Applications

- Fault-resilient power supplies for medical, industrial, and safety-critical systems
- AI-driven diagnostics and forensic tools for power grid reliability

Provide the solutions engineers need. Connect with decision-makers. Reserve your booth today!
